BEARINGS ARE MAGNETIC.  
ALTITUDES, ELEVATIONS  
AND HEIGHTS IN METERS.  
DME DISTANCES IN  
NAUTICAL MILES.  
DISTANCES IN KM.

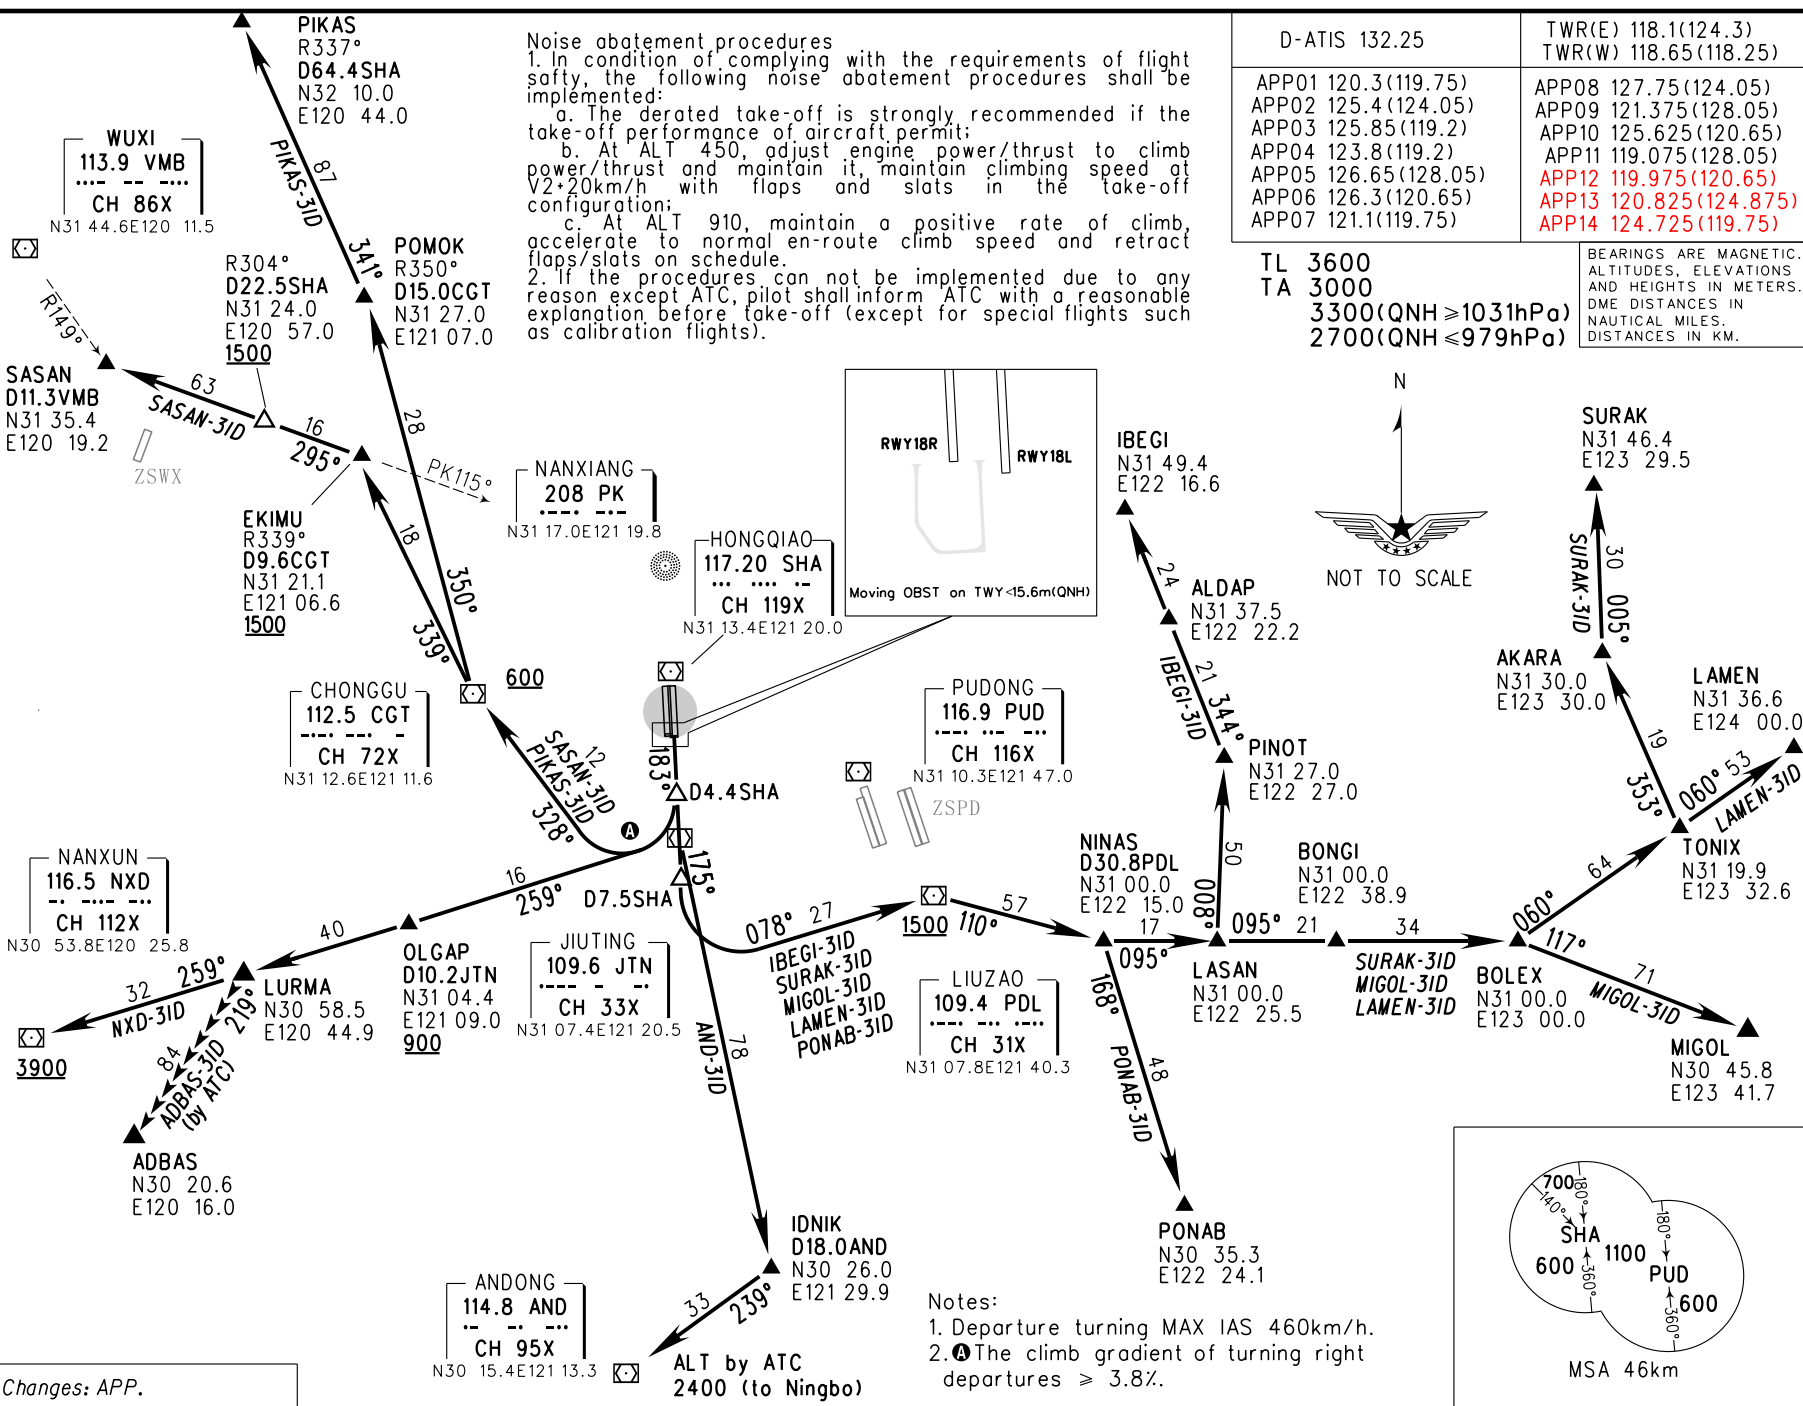

Noise abatement procedures  
1. In condition of complying with the requirements of flight safety, the following noise abatement procedures shall be implemented:

a. The derated take-off is strongly recommended if the take-off performance of aircraft permit;

b. At ALT 450, adjust engine power/thrust to climb power/thrust and maintain it, maintain climbing speed at V<sub>2</sub>+20km/h with flaps and slats in the take-off configuration;

c. At ALT 910, maintain a positive rate of climb, accelerate to normal en-route climb speed and retract flaps/slats on schedule.

2. If the procedures can not be implemented due to any reason except ATC, pilot shall inform ATC with a reasonable explanation before take-off (except for special flights such as calibration flights).

Changes: APP.

Notes:

1. Departure turning MAX IAS 460km/h.
2. The climb gradient of turning right departures ≥ 3.8%.
